RE: Introducing NetStar 5 Mobile App	DATE: September 10 th , 2018

Dear Mercedes-Benz Dealers,

We are pleased to release the Mobile version of NetStar 5. This new mobile application offers access to the NetStar 5 Portal Dashboard, Communications, Links, Inventory, and enhanced Vii (option costs and MSRP) and Mobile PAC Workbench.

The mobile application uses the same security and credentials as the desktop version. If you have access to functions in the desktop version then you will also have access in the Mobile version. Your credentials are required to log in.

To access the application on a mobile device, click on the “Download NetStar Mobile” link in the Administration area of the Links Section, in NetStar 5 (see screenshot below).

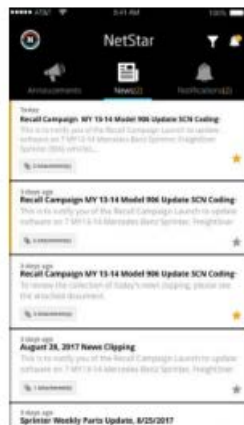

Once selected, please enter the e-mail address to your mobile device and NetStar will send you the link to download the application. If this is the first time you are downloading an App from MBUSA you may have to trust the application in your mobile device. For Apple devices, please go to Settings, select General, next Device Management, and then select Mercedes-Benz USA, LLC. For Android devices, you will be prompted to allow the source when downloading the app.

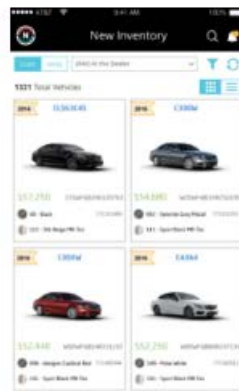

Dashboard

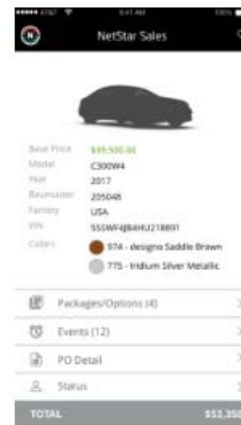

Communication

Inventory

Vii

Please use the Feedback link in NetStar 5 Desktop to communicate about your experience.

Thank you very much and we hope this App will provide quick access to NetStar 5 based information.
